NEW DUO Imperial Sized Column Formwork

For columns up to 24 inches

Boost your crew's productivity with PERI's new DUO column formwork system, now available in imperial measurements, specifically made for the US market.

Columns are adjustable in two inch increments, allowing for column sizes up to 24x24 inches. The lightweight, fiber-reinforced polymer panels come in two sizes and are clamped together in seconds with only a small number of accessories needed.

The DUO column is second to none in terms of simplicity, light panel weight and speed of installation, all while maintaining a 1650 psf pour pressure.

Easy

No measuring needed due to imprinted imperial column dimensions in 2" increments

Fast

In a side by side comparison, DUO was exponentially more productive and efficient than competing systems

Lightweight and Versatile

No need for a crane, panels are extremely lightweight. Column panels can also be used for walls and slabs

- Panels include the formlining
- Accessories made of innovative composite material: polytech
- Extremely light weight
- High load-bearing capacity
- Easy handling
- No hammering needed
- Easy to use
- Fewer components = more diversity in use
